Summary

Software Engineer specializing in scalable system design, RESTful API development, and distributed architectures. Skilled in system design, and database management with performance optimization. Developed real-time applications, multi-tenant architectures, and automation workflows, delivering high-performance and reliable solutions.

Experience

LearnTrail

Software Engineer 1 — Python, Flask, MySQL, RESTful APIs, OAuth

Lucknow, India

April 2025 - Present

PostGenAI

- Developed RESTful APIs and a cron-based scheduling system for automated content publishing, improving system reliability and ensuring consistent task execution.
- Implemented OAuth 2.0-based authentication and authorization for secure user onboarding and access control.
- Designed and developed a scalable SaaS platform using Flask and MySQL, integrating the Google Gemini API to shift users to an AI-driven workflow, reducing average campaign drafting time by **80%**.

Pharmacy Management System

- Architected a secure, multi-tenant inventory ecosystem by implementing Role-Based Access Control and Flask-Login, ensuring **100%** data integrity for medical records and reducing unauthorized access risks.
- Constructed a scalable high-performance dashboard displaying high-demand prescription trends, empowering quicker inventory adjustments and cutting down on expired stock by **15%** through streamlined data logic.
- Engineered an automated billing and real-time stock reconciliation engine; this streamlined the "Procurement-to-Sale" workflow, reduced latency by **40%**.

Creators Adda

Web Developer Intern

Remote, India

June 2024 - July 2024

- Developed responsive, mobile-first web interfaces using ReactJS and Tailwind CSS, improving UI consistency and performance, and accelerating development through reusable components and efficient state management with React Hooks.

Technical Skills

Programming: Python, Java, C/C++, JavaScript, SQL, Data Structures and Algorithms

Frameworks: Django, Flask, ReactJS, RESTful APIs

Databases: MySQL, MongoDB, SQL Server, Redis

Agile & Testing: Unit Testing, Integration Testing, Agile/Scrum

DevOps: Docker, CI/CD, AWS

Projects

FRS | Python, Django, SQL Server, WebSocket, RESTful APIs, Redis

- Delivered a real-time data processing dashboard via Django Channels and WebSockets, replacing obsolete manual reporting; reduced data latency by **93%** and improved overall data accuracy to **99%**.
- Engineered a fault-tolerant offline-to-online sync pipeline using SQL Server UPSERT logic, guaranteeing zero data loss during network drops and eliminating manual IT reconciliation.
- Integrated Redis to cache heavy SQL queries during peak traffic, serving live metrics directly from memory and slashing dashboard response times from **4sec** to under **50ms**.

Education

University of Lucknow, Lucknow

Dec 2021 - June 2025

B.Tech : Electronics and Communication Engineering(ECE)
